SwitchPoint Infinity 3
Orchestrating the OR

Simplified
OR Control

Stryker's SwitchPoint Infinity 3: the central point for managing your OR video and surgical devices.

The intuitive interface allows you to easily control your Operating Room through features like one touch routing and video multi-viewing capabilities.

The OR Integration System
Tailored to Your Needs

- Any-to-Any Digital Video Signal Routing
- Highly Configurable and Extensible
- Designed Specifically for Use in the OR
- Built For Future Expansion

Supported Video Standards
- S-Video
- Composite
- RGBHV
- 3G-SDI
- HD-SDI
- DVI

The SwitchPoint Infinity 3 is compatible with standard video signals and supports resolutions including 1080P and up to 1200P.

Your Control Center
in the Operating Room

Designed specifically for the operating room, the SwitchPoint Infinity 3 features tools that help staff perform tasks efficiently.

Surgical Checklist Integration
Engage team members during surgical time-outs by broadcasting a pre-surgical checklist to all monitor screens.

Customizable Room Presets
Save and preview frequently used room configurations to reduce turn-around time and expedite room setup.

Split Screen and Quad View
Display up to four video sources for viewing multiple modalities on a single monitor.

Centralized Suite Control
Control compatible Stryker surgical equipment from the touch panel to perform tasks and assist team members from a single location.

Control Multiple Computers
Access and control OR computers using a single keyboard and mouse, saving space and reducing clutter.

Teleconference from the OR
Bridge the distance between sites across campus or locations abroad using IP and baseband video-conferencing features.

World-Class
Service and Support

Powered by SORN, Stryker's comprehensive system for remote device management, the SwitchPoint Infinity 3 automatically sends system alerts and maintenance information to technical staff and the Stryker Customer Care team.

SORN immediately notifies Stryker if issues arise, allowing us to respond proactively and keep the system ready to operate when you are.

Remotely Monitor
- Software status
- Hardware maintenance
- Temperature and fan status
- Software versions
